Chloroform meaning in tagalog

render (someone) unconscious with chloroform. Pronunciation[edit] IPA(key): /kloɹɔːfɔrm/ Noun[edit] chloroform (uncountable) Synonyms[edit] trichloromethane chloric ether Guthrie's sweet whiskey, sweet whiskey Derived terms[edit] Translations[edit] Verb[edit] chloroform (third-person singular simple present chloroforms, present participle chloroforming, simple past and past participle chloroformed) To treat with chloroform, or to render unconscious with chloroform. Regarding an ultrasonically assisted henna production, the producer can choose from various solvents such as water, vegetable oils, glycerine, methanol, ethanol, hexane, acetone, chloroform, propylene glycol etc. A colourless, volatile, sweet-smelling liquid used as a solvent and formerly as a general anaesthetic. Chemical formula: CHCl₃. The methanol extract was evaporated and partitioned with n-hexane, benzene, trichloromethane, ethyl acetate and n-butanol, consecutively. "In a first step, the two lipids were dissolved in chloroform and the solvent evaporated under vacuum overnight. "These chemicals were mostly chlorinated solvents such as chloroform." "It does not dissolve in water, although it does dissolve in many organic liquids, such as benzene, chloroform, and carbon disulfide." "Cholesterol is soluble in chloroform, ether, benzene, or hot alcohol and other organic solvents." "The hypophase was removed with a Pasteur pipette and the aqueous phase re-extracted with chloroform until it was colourless." "Some of the volatile substances in these products include toluene, chloroform, butane, propane, acetone, and many halogenated hydrocarbons." "Furthermore, the difference in molecular structures may lead to the difference in the solvent cavities formed by chloroform molecules." "While he is dozy from drink, the 'Little Nurse' passes a cloth, on which she has dropped some liquid chloroform, in front of his face." "The researchers used methanol, chloroform, hexane, or water to extract residues from pot sherds." "This is a modified mixture of Carnoy's fluid containing absolute alcohol, chloroform, and glacial acetic acid." "The literature cites the use of ether, chloroform, acetone and mineral oil as possible options." "Finally, the drugs are recovered by using industrial solvents, such as acetone, ether, or chloroform." "In particular, chloroform would not hinder condensation reactions as water does." "The residue was chromatographed on a column of silica gel prepared with chloroform." "In early days, the dose of chloroform or of ether had to be sufficient to achieve all the required effects, but in modern practice the anaesthetic drug is used only to produce the loss of consciousness and amnesia." "However, when chlorine combines with other materials in water, it forms chloroform and related chemicals called trihalomethanes." "These crystals are confirmed by their solubility in chloroform and ether." "It could give open mask chloroform or ether, but I might be arrested for doing it now." "The last step in the process is to wash the methamphetamine in chloroform, toluene or ether." "naulat na ang sars-cov-2 ay sensitibo sa mga ultraviolet na sinag at nag-iint sa 56°C sa loob ng 30 minuto; ang ether, 75% ethanol, pang-disimpekta na naglalaman ng chlorine, asidong peracetic, chloroform, at iba pang mataba na mga solvent, ngunit hindi chlorhexidine, ay puwedeng epektibong mapatigil ang virus. Definitions and Meaning of Chloroform in Tagalog Defenition(s) a colorless, volatile, sweet-smelling liquid used as a solvent and formerly as a general anesthetic. It is a powerful solvent of wax, resin, etc., and is extensively used to produce anaesthesia in surgical operations; also externally, to alleviate pain. source: Webster 1913 verb anesthetize with chloroform Doctors used to put people under by chloroforming them. source: WordNet 3.0 To treat with chloroform, or to place under its influence. source: Webster 1913 English to Tagalog noun[klóroform] Kloroformo; [Isang gamot na pangpatulog]source: Diccionario Ingles-Español-Tagalog Visual Synonyms it has been reported that sars-cov-2 is sensitive to ultraviolet rays and heat at 56 °c for 30 minutes; ether, 75% ethanol, chlorine-containing disinfectant, peracetic acid, chloroform, and other fatty solvents, but not chlorhexidine, can effectively inactivate the virus. [edit] fluoroform bromoform iodoform Translations[edit] Czech[edit] Pronunciation[edit] IPA(key): [ˈxlɔroform] Hyphenation: chlo-ro-form Noun[edit] chloroform m inan Declension[edit] Further reading[edit] chloroform in Příruční slovník jazyka českého, 1935–1957 chloroform in Slovnik spisovného jazyka českého, 1960–1971, 1989 Polish[edit] Polish Wikipedia has an article on: chloroform Wikipedia pl Pronunciation[edit] IPA(key): ˈxlɔɾɔ.fɔrm/ Rhymes: -ɔɹɔrm Syllabification: chlo-ro-form Noun[edit] chloroform m inan Declension[edit] Slovak[edit] Pronunciation[edit] Noun[edit] chloroform m (genitive singular chloroformu, nominative plural chloroformy, genitive plural chloroformov, declension pattern of dub) (organic chemistry) chloroform Synonym: trichlórmetan Declension[edit] References[edit] chloroform in Slovak dictionaries at slovník.juls.savba.sk English to English nouns a volatile liquid haloform (CHCl₃); formerly used as an anesthetic. Chloroform was the first inhalation anesthetic. source: WordNet 3.0 A colorless volatile liquid, CHCl₃, having an ethereal odor and a sweetish taste, formed by treating alcohol with chlorine and an alkali. Example(s) The methanol extract was evaporated and partitioned with n-hexane, benzene, trichloromethane, ethyl acetate and n-butanol, consecutively.
