

I'm not robot!

Henan Okay plastic has 20 years of experience in the production of PE composite plastic products, the radiation shielding sheet produced by our company can add 3%~40% boric acid according to customer requirements, we can ensure the quality of the product, the product has a consistent density and consistent uniformity. The borated polyethylene (UHMWPE) composite material used for neutron is prepared by hot pressing process of high molecular weight boron board. The borated polyethylene shielding block is a new type of composite material, which is made by mixing boron carbide powder in high molecular weight polyethylene material through high speed stirring, kneading, plasticizing and hot pressing. As shielding neutron, ray, radiation shielding absorption material. The content of borate polyethylene can be customized according to customer needs, and the content range is 3%-40%. Henan Okay plastic has 20 years of experience in the production of PE composite plastic products, the radiation shielding sheet produced by our company can add 3%~40% boric acid according to customer requirements, we can ensure the quality of the product, the product has a consistent density and consistent uniformity. Henan Okay plastic has 20 years of experience in the production of PE composite plastic products, the radiation shielding sheet produced by our company can add 3%~40% boric acid according to customer requirements, we can ensure the quality of the product, the product has a consistent density and consistent uniformity. The borated polyethylene (UHMWPE) composite material used for neutron is prepared by hot pressing process of high molecular weight boron board. The borated polyethylene shielding block is a new type of composite material, which is made by mixing boron carbide powder in high molecular weight polyethylene material through high speed stirring, kneading, plasticizing and hot pressing. As shielding neutron, ray, radiation shielding absorption material. The content of borate polyethylene can be customized according to customer needs, and the content range is 3%-40%. Innovation, excellent and reliability are the core values of our business. These principles today extra than ever form the basis of our success as an internationally active mid-size company for 5% Boron Contain Polyethylene Sheet, Boron Polyethylene Sheet For Nuclear Power Station, 10% Borocic Hdpe Sheet, Cnc Processed Borocic Uhmwpe Sheet, Boron Filled Hdpe Sheet For X-Ray Equipment. We wish to just take this opportunity to ascertain long-term enterprise relationships with clients from all over the earth. The product will supply to all over the world, such as Europe, America, Australia, San Francisco, Philippines, Florence, Roman. Company name, is always regarding quality as company's foundation, seeking for development via high degree of credibility, abiding by ISO quality management standard strictly, creating top-ranking company by spirit of progress-marking honesty and optimism. Tel:+8619937131062. E-mail:vicky@chinaupe.com. 7% borated polyethylene neutron shielding sheet long-lasting. Borated polyethylene is a neutron shielding material specially designed for medical and industrial applications. View More +. Black 10% borated polyethylene neutron shielding sheet 4x8. The rapid development and application of ultra-high molecular weight polyethylene (UHMWPE) plate containing boron in nuclear power, radio logical diagnosis and treatment, industry, high-energy physics research and other fields has become an important radiation damage hazard factor. In terms of fast neutron shielding principle, high density ... The borated polyethylene shielding block is a new type of composite material, which is made by mixing boron carbide powder in high molecular weight polyethylene material through high speed stirring, kneading, plasticizing and hot pressing. Advantage of borated polyethylene sheet : 1. Non-Toxic and smell . 2. Corrosion resistant. 3. Abrasion and impact resistant. 4. Self-lubricating. 5. UV Resistant/ultraviolet-resistance sheet. 6. Can be used under Extremely low Temperature. 7. High Tensile Strength. 8. Low Viscosity. 9. radiation shielding Henan Okay plastic has 20 years of experience in the production of PE composite plastic products, the radiation shielding sheet produced by our company can add 3%~40% boric acid according to customer requirements, we can ensure the quality of the product, the product has a consistent density and consistent uniformity We are an energetic business with wide market for 5% Boron Contain Polyethylene Sheet, 30% Boron Filled Hdpe Sheet, 8% Borated Polyethylene Sheet, Neutron Shielding Borocic Polyethylene Sheet, Borocic Uhmwpe Sheet For Research Center. Welcome any of one's inquiries and concerns for our items, we glance forward to creating a long-term business ... Henan Okay plastic has 20 years of experience in the production of PE composite plastic products, the radiation shielding sheet produced by our company can add 3%~40% boric acid according to customer requirements, we can ensure the quality of the product, the product has a consistent density and consistent uniformity 5% Borated Polyethylene Sheet on sale manufacturers, find details about 5% Borated Polyethylene Sheet manufacturers, supplier and wholesaler - Shandong Langrui Machinery Technology Co.,Ltd., admin@slmtplastics.com 0086-18678355281 Our 2" & 3" thick have higher levels than the 1". 5% Boron by weight to shield neutrons, are boron loaded PE (UHMW) grades. The high hydrogen content of PE (UHMW) makes it very suitable for slowing down fast neutrons to lower energy thermal (slow) neutrons, which are then absorbed by the added boron compound. Whereas both PE-HMW and PE-UHMW are ... We supply various types and grades of Borated Polyethylene: 1% (Grade II, yellow), 2% (Grade III, red) or 5% (Industrial Grade, purple or green) elemental boron content by weight or virgin formulas are available in sheets, blocks, pellets and slabs. Standard sheet size available is 1"x 48"x96", containing 10% boron polyethylene plate has good engineering properties, dimension stability is good, has the satisfactory gamma radiation resistance, using temperature is 80 ~ 100 °C, shielding thermal and fast neutron and gamma radiation is obviously better than the performance of polyethylene, studies have shown that boron anti-radiation ... Model NO.: borated sheet016 Material: PE Kind: Engineering Plastic Sheet Water Absorption: < 0.01% Contraction Percentage: < 0.4% Tensile Strength: 30~40MPa The borated polyethylene shielding blocks is mainly made of boron carbide and polyethylene. Radiation shielding sheet can effectively prevent the harm caused by nuclear radiation to the family and society. 5 borated polyethylene sheet can absorb a large number of neutrons without forming any radioactive isotopes. 5% Borated Polyethylene Sheet is a product specially designed for nuclear shielding applications. The material employs 5% Boron by weight to shield neutrons in a variety of applications including high intensity X-rays, cancer treatment facilities, hospitals, nuclear submarines and nuclear power plants. containing 10% boron polyethylene plate has good engineering properties, dimension stability is good, has the satisfactory gamma radiation resistance, using temperature is 80 ~ 100 °C, shielding thermal and fast neutron and gamma radiation is obviously better than the performance of polyethylene, studies have shown that boron anti-radiation ... Factory 5% borated polyethylene neutron shielding sheet Borated Polyethylene is a product with outstanding performance of neutron radiation shielding. The boron content can be from 1% to 30% by weight and high hydrogen content. Borated Polyethylene Sheet - Manufacturers, Factory, Suppliers from China. The customer satisfaction is our primary target. We uphold a consistent level of professionalism, quality, credibility and service for Borated Polyethylene Sheet, Boron Polyethylene Sheet For Nuclear Usage, Boron Contain Hdpe Sheet For Research Center, 4% Boron Added ... Densetec HDPE - Borated Sheet (5% Borated - Green Color) Densetec Borated Sheet is a product specially designed for nuclear shielding applications. The material employs 5% Boron by weight to shield neutrons in a variety of applications including high intensity X-rays, cancer treatment facilities, hospitals, nuclear submarines and nuclear power plants. 1" thick Plasti-Shield® Industrial Grade borated polyethylene (5%) is in stock. 2" & 3" thick is compression molded in as little as two to three weeks. Cutting and machining of borated polyethylene to your specs. 1.000" x 48" x 96" Borated PE 1.000" x 48" x 96" Borated (5%) PE polyethylene, purple in color, compression molded BUY NOW >> 5% Borated Polyethylene Sheet is a product specially designed for nuclear shielding applications. The material employs 5% Boron by weight to shield neutrons in a variety of applications including high intensity X-rays, cancer treatment facilities, hospitals, nuclear submarines and ... Henan Okay plastic has 20 years of experience in the production of PE composite plastic products, the radiation shielding sheet produced by our company can add 3%~40% boric acid according to customer requirements, we can ensure the quality of the product, the product has a consistent density and consistent uniformity
